

My personal beliefs are reflected in this brochure. I offer the enclosed information for your consideration. Any information you choose to make use of is at your own discretion. Nothing stated herein is meant to imply any medical advice.

What is a talisman?

Many think of a talisman as a protection or a guard against evil. However, the word derives from the Byzantine Greek word *telesma* originally meaning completion. Thus, I believe a talisman can provide completion on an energetic level; bringing energetic support and insights needed to accomplish the path we have set for this life.

This is not a magic pill solution to life, though. We are not static beings and, as we make choices we may veer from the path we had hoped to complete or we may reach a new level and need to adjust the support. Occasional new readings at these points are revealing through the changes in materials offered.

Intention: Living in the joy of the heart chakra

Life Path Readings

Intention: Attainment of soul's deepest desires

Your Personal Reading

A reading provides information relating to your life path. It may contain visions, an automatic writing message, and/or an animal totem or other symbolism information, plus the materials for a personal talisman. Each reading is a uniquely individual experience.

Design Work

With continuing guidance, the materials from the reading are assembled. The guidance is fine-tuned to the exact shape, size or color of the required stones to select in my studio. Sometimes material must be ordered or found and can extend the time required to present the final talisman.

At this point, my personal sense of design, color and balance is utilized to create the talisman, always honoring what I have been told to make.

Setting the Intention

Once the design is complete, the piece reveals its intention through experiencing its vibrations. This generally incorporates aspects of the lore surrounding the individual components.

Intention: Moving forward through acceptance of the Divine

Intention: Bringing all aspects of being into harmony

Interpretation

The information in the reading is interpreted through an exploration of the traditional lore for the materials and symbols presented. The interpretation of the individual components adds dimension to the overall intention as well as offering additional illuminations of aspects on life's path. This information and the intention are provided in a letter for the recipient.

Cleansing

There are many ways to renew energy in stones. Pick one that appeals to you, being sure to consider the other materials in the piece. For example, do not choose water if your piece is strung on leather. Select a method included in this brochure or check our website, just be aware that some methods are not advised for certain stones. Some should not be exposed to extended sunlight. Others react to salt or chemicals that may be present in water.

Smoke (Smudging): Choose a smudging herb such as sage or sweetgrass, or use your favorite candle or incense. (I like frankincense.) Be sure to use a fireproof container for burning the herbs. Pass the talisman several times through the wafting smoke to refresh the vibration levels of the stones, refreshing the intention at the same time by asking your guides, angels, or Higher Self to restore the intention of the piece. Use whatever wording resonates with you and finish with an expression of thanks.

Music: If you have access to a piano, place the talisman on the piano. While holding down the right pedal, play every key, black and white, from one end to the other. (This requires a full 88 keys, not an electric keyboard.) Wait for all sound to dissipate. Repeat the process twice more, alternating the direction of play. You may feel your energy refresh, too.

Intention: Divine guidance
